

Switch from
overtime to **on time**
through automation

“

**The best workflow
solution on the market**

“When you find yourself looking for the **best workflow solution** on the market, you quickly end up **looking into Switch.**”

- *Eric Olijve, director of NetzoDruk*

Why Automate?

Save

- ✓ **Time**
Automate repetitive tasks to increase your total throughput of jobs.
- ✓ **Money**
Standardize processes to reduce human errors & rework.
- ✓ **Resources**
Customize workflows to free up employee time, optimize customer service and stimulate creativity.

Gain

- ✓ **Quality**
Enhance your entire workflow to decrease employee stress.
- ✓ **Profit**
Increase your job throughput to get more projects and more revenue.
- ✓ **Competitive advantage**
Work smarter, not harder.

How does Switch make automation work for everyone?

Ecosystem

It's not only a workflow, it's an environment.

- Switch integrates with **numerous third-party applications** for the printing, publishing and graphic industries.
- A certified Enfocus channel partner will **integrate** your existing systems in a **Switch enabled workflow** and onboard you in the community. Afterwards, they will provide **support and upgrades** as part of a maintenance agreement.
- The **Enfocus Appstore** adds even more smart functionality to your workflow, one app at a time.
- There are plenty of **online platforms** where Switch users **learn** from each other. Whether it's our own community forum, or a group on social media, you will always **find a place to ask questions and learn from the community**.
- The Enfocus **support team** is there to provide expert support.
- Even if all of the above don't fit your needs, we can always develop a **tailor made integration** for you through our professional services team.

Modular

Start small, grow bigger

Switch is a **modular solution** that grows with your business. The Switch Core Engine is essential to automate the basics and can be **extended with a range of modules and apps**. Grow the solution with your workload. **Start small, grow bigger**.

Beyond our goal thanks to Switch

“

“Switch has done a great job for us. It has gotten us beyond our goal of getting 80% of the manual steps out of our workflow, because we have reached a 100% within the year, without entailing an exorbitant financial investment. And we're continuing to go further with it.”

- J. Saunders, Manager of Amending and Box Goods Manufacturing, William Arthur (US)

The most open solution in the market

Open

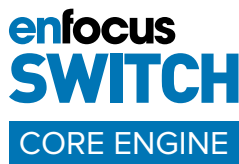

- Easily **integrate** your applications and data.
- Connect with any **external database**.
- Build your own **customizations** through scripting.
- Submit and control jobs through **web services**.
- Active Directory user management **support**.

The core

The Switch Core Engine is the **beating heart** that drives your automation. It enables you to use job and file information to automate routing and processing.

The Enfocus Appstore proves that co-creation pays off. Our community continuously improves our system and gets rewarded for it. Peer empowerment – **better and stronger together.**

- Configurator Module
- Metadata Module
- Database Module
- Scripting Module
- PDF Review Module
- SwitchClient Module
- Connect Module
- Web Services module
- Enfocus Appstore
- Performance Module

The modules

We know automation comes in stages. Select just the right module for the level of automation you want. **Select just the right module for the business stage you're in.**

- Configurator Module helps you to **integrate, control** and **automate** third-party applications.
- Metadata Module **enhances the workflow intelligence** by giving access to internal or external job related metadata.
- Database Module provides a **direct read and write connection to any SQL data source.**
- Scripting Module gives you the freedom to completely **customize your workflow.** Build your own workflow step using our JavaScript™ API.
- PDF Review Module enables full rendering disclosure of PDF content in an error-free approval procedure.
- SwitchClient Module allows users to submit and route jobs by using **modern browser environment.**

Not sure what you need? Our certified Enfocus resellers will advise you on the best solution for your business stage and budget.

**Start small, grow bigger.
Automate and evolve
beyond your competition.**

- Connect Module allows you to **fully customize and standardize** the way you receive files from your customers.
- Web Services Module allows you to **integrate** your workflow into your **web portal.**
- Performance Module allows you to **leverage more powerful hardware** and **increases the number of concurrent tasks** that can be executed.

Key Integrations

COMING SOON

How Switch makes your life easier

Automate repetitive tasks

Create powerful workflows that ensure your **desired level of consistency and quality**, while being **flexible** enough to adjust to new business needs as they develop.

Integrate partner applications

Easily integrate various applications from industry leading providers.

The **Enfocus Appstore** is a marketplace where Switch experts from around the globe offer their expertise. Simply drag and drop it into your workflow.

Modular approach

Only **pay for what you need** today and **add functionalities** as your business needs grow.

“

A defined, centralized workflow

“We handle 2,500 orders per day across multiple product lines coming from online services. Switch pulls everything together. Now we have a **defined, centralized workflow for managing, processing and distributing files**, as well as **updating and interacting with several databases**.”

- *Brian North, Group Workflow Specialist at Tangent (UK)*

ENFOCUS IS AN ESKO COMPANY

Switch 2018 - New Features

Switch 2018 is all about improving **efficiency through production transparency** and making life a lot easier! With **significant new features** and, as always, a number of customer-requested improvements, we are confident that **Switch 2018 will further improve your productivity**.

In a cost-critical environment, time saving solutions are no longer a nice-to-have but **an essential part of an efficient workflow**. And with technology constantly advancing, it is important that print providers keep up with the latest solutions and to **future proof their investments**.

In short, **Switch 2018 ensures that you are running your print business in the most efficient way possible**, giving you the competitive advantage.

Job Finder

The new **Job Finder** feature is for **everyone who needs to quickly find the status of a job**, based on where the job is within a Switch flow. In a first step **to achieving production transparency**, and as a direct result of **extensive input from users**, this feature **includes customizable boards**. It makes it **easy to locate specific jobs in Switch flows** – a task that would typically take a significant amount of time to complete.

Webhooks

Connectivity with external services is now also possible through Webhooks. Aimed at script-writers, App creators and integrators, this essential new tool will **transform the way Switch flows and scripts connect to external services**.

Simply put, **Webhooks allow external applications or services to send notifications to Switch**. For example, the notification could contain the status of a job or trigger an update when a new order comes in via the MIS system.

Private Data

Private Data is a powerful new feature for flow managers. Previously only possible through scripting, the new Private Data feature in Switch 2018 **enables the user to store, customize and manage specific data within Switch**. Switch 2018 makes private data **much easier to handle** and readily available to both technical and non-technical users.

Improvements

Building a flow is faster than ever in Switch 2018. Some of the most frequently used actions can now be triggered by just one click!

There's a one-click action to access the sample job variables and metadata, and a one-click action to release all connections that are currently set on hold.

Based on the requests of Web Portal (Job Client) users, a one-click action was also added to open jobs in their native application for quick edits and an option was added to select and process multiple jobs at once.

5 Reasons why you need Switch 2018

1. **Find your jobs in an instant** and use Job Finder boards to keep your production in check
2. **Benefit from the latest technology to connect** to modern external services
3. **Open and edit jobs in their native application** from within your web browser
4. Have **up-to-date support for your Operating System**
5. **Simplify how you handle and update data** in your Switch flows
